

Features:

- ♦ $976\pm 1\text{nm}$ wavelength
- ♦ 900W output power
- ♦ 220 μm fiber core diameter
- ♦ 0.22 NA
- ♦ 1020nm~1200nm feedback protection

Applications:

- ♦ Fiber Laser Pumping
- ♦ Scientific Research

976nm 900W Wavelength-Stabilized Fiber Coupled Diode Laser RPK976S-N9-900.0W-22022-NA

Specifications (25°C)		Symbol	Unit	RPK976S-N9-900.0W-22022-NA

(1) Data measured under operation output at nominal output power@25°C.

(2) A non-condensing environment is required for operation and storage.

(3) Operating temperature defined by the package case. Acceptable operating range is 23°C~27°C, but performance may vary.

(4) Wavelength-Stabilized : Percentage of power in band of 974.5nm to 977.5nm $\geq 90\%$.

OPERATING NOTES

- ◆ Avoid eye and skin exposure to direct radiation during operation.
- ◆ ESD precautions must be taken during transportation, storage, and operation. A short-circuit connection is required between pins during transportation and storage.
- ◆ For lasers with operating currents above 6A, connect leads by soldering. The soldering point should be as close to the middle of the pins as possible, with a temperature below 260°C and a soldering time of less than 10 seconds.
- ◆ Before operating the laser, ensure that the fiber output end is properly cleaned. Follow safety protocols when handling and cutting fiber to avoid injury.
- ◆ Use a constant current power supply and avoid surges during operation.
- ◆ Operate within the rated current and power levels.
- ◆ Ensure proper cooling during operation.
- ◆ The operating temperature range is 23°C to 27°C.
- ◆ The storage temperature range is -20°C to +70°C.
